

KHUBAIB JAVAID

D O T N E T D E V E L O P E R

PROFILE

Dedicated .NET developer proficient in C#, ASP.NET Core MVC, Web API, and Entity Framework Core, with experience in optimizing SQL Server and Oracle databases. Skilled in Microsoft Azure services (App Services, Cosmos DB), SignalR for real-time applications, Firebase for notifications and cloud configurations, and CMS platforms like Sitefinity and Umbraco. Experienced in Agile methodologies, CI/CD pipelines with Azure DevOps and GitHub, and secure authentication using Microsoft Entra ID. Committed to delivering user-centric solutions through clean code, collaboration, and continuous learning.

PROFESSIONAL EXPERIENCE

.NET Developer

Applab Qatar | Mar 2023- Present

- Developed and maintained .NET Core MVC and Web API applications, implementing scalable, secure, and efficient backend solutions.
- Integrated and customized CMS platforms including Sitefinity CMS and Umbraco CMS, enhancing website functionality and performance for various clients.
- Designed and optimized database solutions using both SQL Server and Oracle Database, focusing on query optimization, stored procedures, and data integrity.
- Implemented and configured Microsoft Azure services, including App Services, APIs, Blob Storage, and Cosmos DB, to ensure seamless cloud deployments and integrations.
- Configured and deployed real-time applications using SignalR for live updates and interactive user experiences on web platforms.
- Managed application deployments on both Azure App Service and IIS Express, ensuring smooth CI/CD processes and minimal downtime.
- Integrated Firebase services for notifications and cloud configurations to support cross-platform functionality.
- Implemented Microsoft Entra ID (Azure AD) authentication for secure access management and role-based authorization across systems.
- Worked with Azure DevOps and GitHub repositories for version control, CI/CD pipeline configuration, and collaborative development workflows.
- Collaborated closely with cross-functional teams to deliver high-quality, user-focused solutions that met business and technical requirements.

EDUCATION

University of Gujrat, Pakistan

Bachelors in Information Technology
2017 – 2021

SKILLS

.NET Core, ASP.NET Core MVC, ASP.NET Core Web API, C#, Entity Framework Core, LINQ, Razor Pages, SignalR, Sitefinity CMS, Umbraco CMS, Microsoft Azure, Azure App Services, Azure Blob Storage, Azure Cosmos DB, Azure APIs, Azure DevOps, CI/CD Pipelines, GitHub, IIS Express, Firebase, Microsoft Entra ID (Azure AD), Role-Based Authorization, SQL Server, Oracle Database, Query Optimization, Stored Procedures, Data Integrity, Clean Architecture, Repository Pattern, Unit Testing (xUnit/NUnit), Integration Testing, Debugging, Code Refactoring, Agile/Scrum, HTML5, CSS3, JavaScript, Bootstrap, Responsive Web Design, Visual Studio, Postman, Git, SSMS, Oracle Developer Tools, Problem Solving, Team Collaboration, Continuous Learning, Requirement Analysis

Web Developer Internship

Innovative Technologies, Pakistan | Apr, 2022- Mar, 2023

- Developed and maintained robust web applications using ASP.NET Core MVC and Web API, ensuring scalability, performance, and security.
- Collaborated with cross-functional teams (UI/UX, QA, and Product Management) to deliver high-quality, user-centric solutions and enhance overall functionality.
- Implemented responsive and adaptive UI designs using Razor Views, HTML5, CSS3, JavaScript, and Bootstrap to ensure seamless performance across devices.
- Optimized application performance through code refactoring, debugging, and efficient use of asynchronous programming and Entity Framework Core.
- Integrated third-party and RESTful APIs to extend system capabilities and enable seamless data communication between services.
- Participated actively in Agile/Scrum processes, contributing to sprint planning, daily stand-ups, and retrospectives to ensure on-time delivery of project milestones.
- Conducted unit and integration testing using xUnit/NUnit frameworks to ensure reliability and maintainability of code.
- Continuously enhanced technical expertise in .NET technologies, Azure cloud services, and modern development best practices to align with industry trends.

C# Developer

EraTech Technologies, Pakistan | Feb, 2022 - Apr, 2022

- Developed and maintained C# applications to support diverse client projects, focusing on reliability, maintainability, and scalability.
- Collaborated with senior developers and cross-functional teams to gather requirements, design features, and implement effective software solutions.
- Applied object-oriented programming (OOP) principles and design patterns to enhance code structure, reusability, and clarity.
- Implemented best practices for clean code, performance optimization, and error handling, ensuring high-quality deliverables.
- Participated in code reviews, contributed to improving team coding standards, and learned from feedback to enhance technical proficiency.
- Assisted in debugging, testing, and deployment activities, gaining hands-on experience with real-world development workflows.
- Engaged in continuous learning of the .NET ecosystem, including ASP.NET Core, Entity Framework, and Visual Studio tools, to stay current with industry practices.

PROJECTS

STATE AUDIT BUREAU (SAB)

API based .NET core project with integration of Oracle Database stored procedures, Firebase integration, JWT authentication.

ERTIBATAT - QOC(Qatar Olympic Committee)

.NET Core MVC and API based project.

Focusing on the below points;

1. .NET MVC Razor Pages for Creating the CMS.
2. Azure Intra AD Integration
3. SQL Server Database, Code First Approach
4. Dynamic Forms Integration with Alpine.js
5. Linq Queries Implementation
6. JWT authentication

KHADOOM - QOC(Qatar Olympic Committee)

.NET Core MVC and API based project.

Focusing on the below points;

1. .NET MVC Razor Pages for Creating the CMS.
2. Azure Intra AD Integration
3. Oracle Database, Stored Procedures Integration
4. Dynamic Forms Integration with Alpine.js
5. Linq Queries Implementation
6. JWT authentication

MOT (Ministry of Transport)

ASP.NET based Application

Technologies: Web APIs, HTML, CSS, JavaScript, jQuery, Ajax, SQL Server Database

Focus: Deployment using dependency injection

QNA - Qatar New Agency

Umbraco CMS based project. Technologies: ASP.NET core, Web APIs, SQL Server Database, Converted from Sitecore to Umbraco

International Media Office, Qatar

Sitefinity CMS .Net core, Full template integration, Technologies: SQL Server Database, ASP.Net core, Focus: Content management and deployment of useful modules and components

Qlife

Sitefinity CMS .Net core, Full template integration, Technologies: SQL Server Database, ASP.Net core, Focus: Content management and deployment of useful modules and components
